

AIR FREIGHT – DELIVERY METHOD FOR TIME CRITICAL DELIVERIES

Air freight services are reserved for emergency and time critical shipments or are utilized for last minute replacement items in order to meet deadlines. This option is costly but precise. Once Mincey Marble has produced the order and the material is ready for shipment, a truck will pick up the material and drive it to the airport. Once loaded the material is flown to a major airport hub where it is unloaded, placed on a pre-arranged truck and driven to the jobsite.
