## Mincey Marble's Product Spotlight

For the next few months, our Product Spotlight will focus on our shower pan line designed for RENOVATIONS. If you have any questions or would like to request a quote, just [click here](#) and someone in our sales department will contact you shortly.

**Our August Product Spotlight focuses on:**

### **CFP-3060-OS/SF with 4" integral front curb**

PHOTO FEATURES THE TS-VN/3 X 6 SUBWAY WITH RIVER ROCK LISTELLO AND THE MMES-1060-11-40 CURVED GLASS SHOWER DOOR

The 30-36" x 60" bow front shower pan was designed to accommodate a beautiful bow front frameless by-pass shower door, which we stock. This pan is 30" at the sides and bows out to 36" allowing extra elbow room in the middle of the shower. Available with a left or right drain, the drain is located 8.5" off of the side wall so that the drain lines up with the drain of the tub it replaces. It has a 4" integral front curb, solid one – piece construction, an abrasion resistant gel coat surface which makes it impervious to mold and mildew, and a textured non-skid surface. All of our pans and other bath products have very low maintenance making them the favorite bath surface of housekeepers.
