Installation Instructions for Mincey Marble Manufacturing, Inc.

Amenities Niche without Fan Header

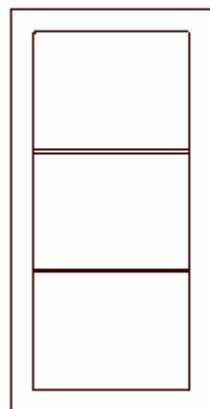

Part number: AN-02

AN-02

These instructions have been written for Mincey Marble's AN-02 Amenities Niche without fan header. If you have an AN-01 Amenities Niche with the fan header or an AN-04 Hampton/Homewood Amenities Niche, please call our office so we can send the proper instructions to you.

Tools /Materials Required

1. Latex caulk for marble to drywall seams, color matched for your niche
2. Clean, dry cloths to clean amenities niche and wipe caulking
3. Construction adhesive for adhering amenities niche to the wall
4. Hot melt glue gun and glue sticks
5. 2' level
6. Pencil

The rough opening for the amenities niche should be 15 1/2 "wide by 33" tall. You will also need a minimum of 12" deep empty space where the amenities niche will be installed in the wall. This is because, of necessity, the niche recesses into the wall.

To install the Amenities Niche:

1. Once the rough opening has been built, finish the sheet rock around the area of the opening and paint or apply wallpaper before installing the niche and fan header.
2. Dry fit the amenities niche in the rough opening, to ensure it seats properly. Use the 2' level to level the niche. Make a reference line at the top of the niche to align the niche when installing.
3. Apply construction adhesive to the back of the amenities niche and install the amenities niche. Note: you may want to use a small amount of hot melt glue to help hold the niche in place until the adhesive has time to set.
4. Caulk with appropriate color latex or acrylic caulk around the edges of niche, where marble meets drywall or painted or wallpapered walls..
5. After installation is complete, remove the protective film from the acrylic shelves, being careful not to move the niche's position.
6. Clean the niche and shelves with clean rags and clean water.
