Installation Instructions for Mincey Marble Manufacturing's

**Standard Rectangle
Vanity Top**

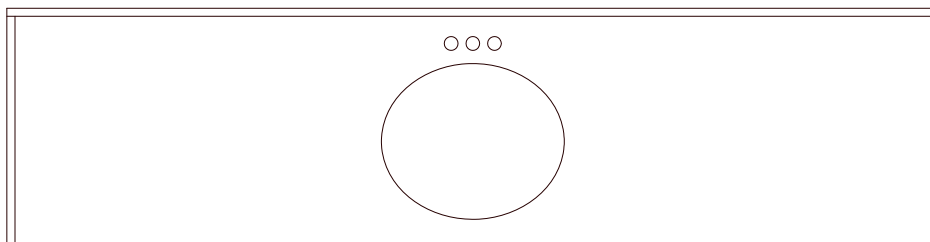

Product number: VT- 01

VT- 01

Please read the following before attempting to install your cast marble vanity top.

These instructions have been written for Mincey Marble's VT- 01 Standard Rectangular Vanity Top. If you have a product that is different than the style shown below, please call us for instructions for the product you have purchased.

INSTALLERS NOTE: These instructions are for general use only. Check plans and local codes for exact specs.

Tools /Materials Required:

1. Circular saw with a masonry blade
2. Measuring tape
3. Pencil
4. 4' level
5. Framing square
6. 100% silicone for marble to marble seams (color matched for the marble)
7. Latex caulk for marble to drywall seams
8. Clean, dry cloths to clean top and wipe caulking
9. 5/16" nut driver or Flat head screwdriver

Instructions for installation for wall to wall tops, with a 22" – 24" depth

These instructions are for installation of vanity tops on a millwork cabinet. Measure the opening and cut the vanity top to fit, if necessary. If using an under mount bowl, mount it before installing the vanity top. Run a bead of silicone around the bowl, and then center it to give an equal overhang around the cut-out then with the mounting hardware secure the bowl to the top. **Hand - tighten** only so as not to drive the screw thru the top. Now, the vanity top can be installed onto the cabinet. Side splashes should be glued to the wall with a small amount of silicone on the back of the splashes. Next, seal the top of the back splash and side splashes with a latex caulk, or approved sealant. The seam where the separate splashes make contact with the vanity top should be sealed with a matching 100% silicone.

*Check specifications for proper sealants. We suggest 100% silicone.

Please call Mincey Marble Manufacturing at 800.533.1806 with any questions.
