

Care & Maintenance Guidelines for Mincey Shower Enclosures

Cleaning & Maintenance Tips:

To properly maintain the clarity and enhance the service life of Mincey shower enclosures we recommend that you follow these basic cleaning and maintenance guidelines:

- Always use a mild soap or glass cleaning solution.
- Regular use of a clean, lint-free microfiber cloth or squeegee is an easy way to remove soap, dirt and other shower residue.
- Once soil and residue is removed, thoroughly rinse all cleaning solutions and other debris from the glass.
- Rinse and dry all cleaning solutions from the door handles, frames, guides, hinges, fasteners and any rubber or plastic sealants.
- Do not allow splashed materials such as dirt or oil to dry on the glass surface.
- Do not use soaps, shower products and cleaning products that contain abrasives or are acid based when cleaning the shower enclosure. If you must use them, avoid vigorous wiping of the glass while these products are on the glass to prevent scratches and other damage to the glass and metal.
- Do not use scrapers, steel wool or razor blades to remove stubborn deposits or labels. They can cause scratches and damage to the glass and metal.
- For areas with hard water, due to a higher concentrate of mineral deposits such as lime and calcium, a build-up may occur on the glass and may not be easily removed with a mild detergent. A solution of white vinegar and water (1 part vinegar to 5 parts water); will need to be used occasionally to dissolve these deposits.

Cleaning & Maintenance for Easy Care Coated Glass:

- A soft cloth or wet sponge and most common cleaners are all that are needed for periodic maintenance.
- Avoid abrasive cleaners.
- Hydrofluoric and phosphoric acid are corrosive to the coating and glass surfaces and should not be used.
- Do not use abrasive brushes, razor blades or other sharp objects to remove stubborn deposits or labels. They can cause scratches and damage to the glass.

Thank you for purchasing a Mincey Marble product. We make every effort to produce the finest product available today. If you have any questions or encounter a problem, please contact our office at 800.533.1806 Monday through Friday, 8:00 am – 5:00 pm EST and ask for Jeff McCurdy in customer service.
